Professional Summary

Mechanical professional with 7 years of experience in the automotive industry, currently completing a Bachelor's in Computer Engineering. Although I am new to the IT field, I am highly motivated to learn, adapt, and contribute to software development and technology projects. Strong analytical skills, problem-solving abilities, and attention to detail developed through years of hands-on technical work.

Education

Bachelor's in Computer Engineering – Universitat Oberta de Catalunya (UOC), Spain (Expected 2026)

- Focus: Programming, Systems, Software Development, Project Management

Professional Experience

Automotive Mechanic / Technician – [Previous Employer], Spain (2016–2023)

- Diagnosed, repaired, and maintained vehicles with precision and efficiency.
- Developed problem-solving and analytical skills in high-pressure situations.
- Collaborated with teams to ensure timely, high-quality results.
- Adapted technical knowledge to new systems and tools, demonstrating learning agility.

Projects / Personal IT Experience

- Built small scripts or projects in Python/Java as part of coursework.
- Learning web development, databases, and software testing.
- Built small projects and apps, posted in my github.

Technical Skills

- Programming: Python, Java, SQL, HTML, CSS, Typescript.
- Tools & Platforms: Linux, Git, VS Code, xcode, node.js, astro, LLM
- Other Skills: Problem-solving, teamwork, adaptability, strong attention to detail

Languages

- Spanish – Native
- Catalan – Native
- English – Fluent
- Japanese – Conversational

Additional Info

- Highly motivated to transition into IT and eager to learn and grow in software development roles.
- Strong interest in technology, programming, and emerging IT solutions.
